Sustainability

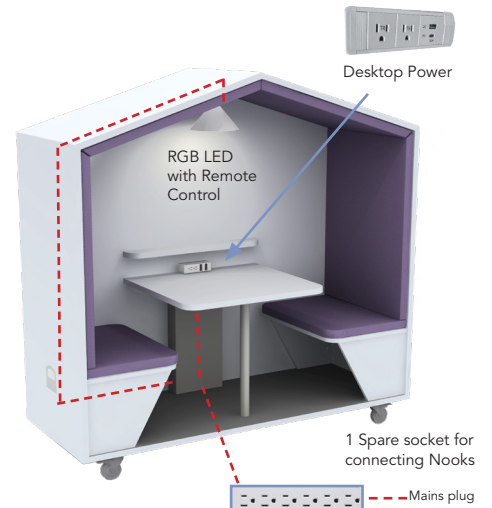

At Nook, we strive to develop & design products that lessen the impact on the environment through use of alternative materials & eco-friendly technology. It is our corporate policy to comply or exceed with all applicable environmental regulations, employ contemporary recycling, waste reduction and sustainable practices.

- Standard particle board is M3 industrial
- All laminates used are GreenGuard certified
- Grade 47 lb. density fiberboard, 100% pre-consumer recycled wood fiber particle board
- Adhesives are water based with no added urea-formaldehyde, low VOC emissions
- Meets California Air Resources Board (CARB-2) and TSCA TITLE VI
- Products are designed to be extremely flexible, lightweight, movable and storable. Flexible spaces reduce the overall footprint and building materials required for a building
- Products are packaged using returnable (blanket wrapped) or recyclable (cardboard, wood and plastic) materials which can reduce disposal into landfills
- Meets California TB1117 Section 1 Flammability Standard

Manufactured in USA (Wisconsin)
