1. Who we are

A small group of flex-working, purpose-driven founders with a passion for people, places and planet

We use design and education as a tool for driving change toward greater sustainability and care in the world.

We believe in a philosophy called **Design For The Extreme Benefits The Mean.**

2. Why we are here

To expose all our hidden abilities which are currently locked away by a one-size-fits-all approach to workplace, education, healthcare and events.

We exist to make the built environment more neuroinclusive. We believe this is essential for improving how we move forward.

What got us here
Won't get us there.

This is the change moment.

3. What we do

We make an award-winning family of mindful, restorative pods, booths and shelters

Nooks remove a person from the spotlight and overstimulation without isolating them.

Users gain clarity and focus, through psychological safety and reduced disturbance.

Engagement, productivity and Universal Workforce inclusivity are demonstrable outcomes.

We also help our customers improve spaces utilisation, be better prepared for change, and build stronger communities

NOOK

**UNLOCK SPACE.
UNLEASH MINDS.**

BUILT FOR FLEXIBILITY,
FOCUS & ENGAGEMENT.
WITH LOVE FOR PEOPLE,
PLACES AND PLANET.

How We Work

By combining design for the mind with circular thinking, we craft retrofittable, plug and play, affordable, space-within-a-space solutions which can help to transform a place from one size misfits all, to flexible, human-centric and future-proof.

What Makes Us Different

We bake science and mental health expertise into our designs.

Our obsession with circularity, longevity, repairability, re-use & hackability.

Our focus on the long-term experience rather than the momentary sale.

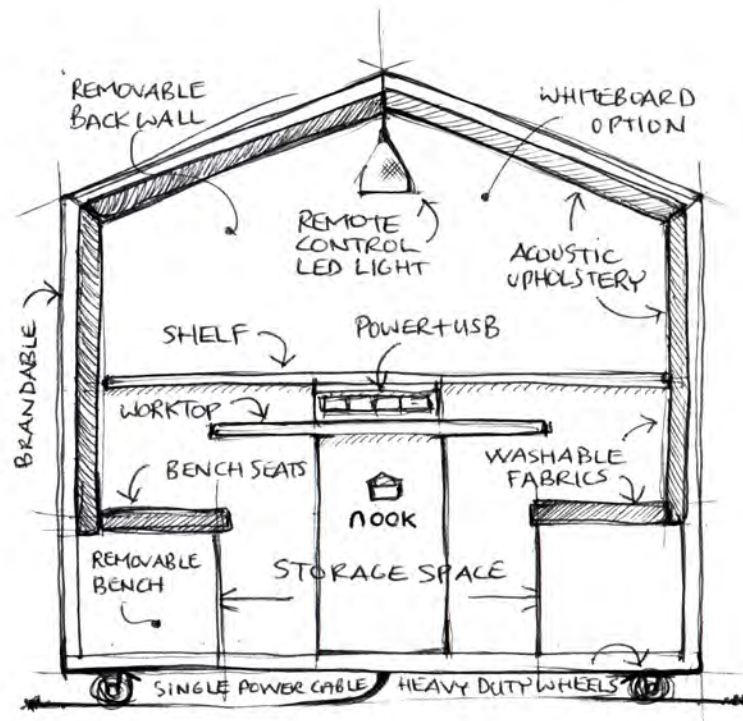

Our openness to not knowing everything, to being vulnerable, human.

Our Aim

To help our built environment to embrace the natural variations in how we all think and act, in order to build an equitable, sustainable world in which our neuro-advantages are understood, amplified and celebrated.

The original Nook idea. A small personal space, removing uncomfortable sounds, providing protection on five sides and allowing the occupant to select their own lighting mode, without affecting anyone else.. Created as a response to excessively open plan workplace. A safe hiding place to step out of the spotlight, observe the world, while focusing on self.

The flagship Nook Huddle Pod, an award-winning wellness-first mindful space for everything from personal care and recharge, to meetings, training, video calling, podcasting and more..

Nook Huddle Pods are found in the worlds most successful organisations, as well as the smallest class rooms, charities, micro-businesses & coworking.

UP CLOSE: PRODUCT FEATURES

REPAIR, RE-USE, RE-LOVE

Nook are made from a common set of parts, all of which are interchangeable, repairable and replaceable.

We design with backward compatibility, meaning new features can be retro-fitted to older models and parts rarely become obsolete.

We keep a list of those for whom new Nooks were not within budget, so that pre-loved Nooks can easily be re-homed.

Because caring about Accessibility also means working to solve Affordability.

LIGHT MATTERS

Light has a profound effect on how the mind processes information and plays an important role grounding a person in a space.

The colour of light affects how we feel – hot, cold, calm, safe, anxious etc. It can also aid or amplify a neurodifference, such as dyslexia or autism.

Ordinarily, lighting is based on the average requirement in the space. With Nook, the occupant can adjust the lighting to their own needs, without affecting everyone else.

We work with experts in sensory fields to imbue Nook with impactful levels of lighting choice.

This level of agency is key in helping to be our best selves and to creating a sense of Belonging in a space.

POWER TO THE PEOPLE

Power anxiety is a real very thing. The shift to mobility means we are now carrying around the tools critical to our productivity.

Finding somewhere to top-up or to guarantee power resilience on an important video call occupies a new and not insignificant place in our decision making.

As nomads, coworkers and travellers ourselves, we made sure that Nook would help to provide that power security.

Mains and USB sockets are included as standard in all Nooks, with wireless power charging options available too.

THIRD-PARTY INTEGRATION

Nook is designed with adaptation in mind. Fixing points, cable channels, modular components, removable elements – its all ready and waiting for you to imagine what comes next.

We never think our product is truly complete until it is adapted by the next people along the line.

Most take the Nook as they find it, out of the box, so to speak. But for others, that is only the starting point, the canvas, on which they paint.

Talk to us about your ambitions, be it a mindful yoga pod, a retro gaming pod, a machine-human interface or if you just want to mount a TV on the wall.
